

INTERNATIONAL ACADEMY OF NDT

RENEWAL AND RECERTIFICATION OF LEVELS 1 & 2 CERTIFICATES

1. Introduction

1.1 General

After the first five years of validity, Level 1 and Level 2 certificates may be revalidated without examination, while certificates renewed five years previously can only be revalidated through the recertification process (see definitions) involving success in an examination conducted by an Certification Body (CB).

2. Terms and Definitions

Renewal: The procedure for revalidation of a certificate without examination at any time up to five years after success in an initial, supplementary or recertification examination.

Recertification: The procedure for revalidation of a certificate by examination conducted at CB or by otherwise satisfying the Certification Body that the published criteria for recertification are satisfied.

Significant Interruption: An absence or a change of activity which prevents the certified individual from practising the duties corresponding to his or her level in the method and the industrial sector(s) for which the certificate is valid, for (a) a continuous period in excess of 12 months or (b) two or more periods for a total time exceeding 24 months.

Note 1: Legal holidays, or periods of sickness or courses of less than thirty days are not taken into account when calculating the interruption.

Surveillance: a process which takes one of the following forms:

Monitoring: the formal assessment (by an appropriately qualified person) of the complete testing process, including preparation, pre-test calibration, conduct of NDT, and recording/reporting, carried out by the certificate holder in the course of his or her normal work activity and recorded

Re-inspection: a second or repeat inspection (carried out by an appropriately qualified person), using the same NDT instruction or procedure as used in the original test carried out by the certificate holder in the course of his or her normal work activity and recorded

Note 2: For radiography, the re-inspection may be limited to a second interpretation and report on the original radiographs. It is not necessary to inform the individual who is the subject of surveillance that re-inspection is to take place.

Note 3: The person carrying out the re-inspection, as well as the person whose work is the subject of re-inspection, is considered to have undergone surveillance and may record as much, in which case such re-inspection records shall be countersigned by the person who is the subject of the re-inspection.

Supervised Test: The testing of an appropriate training specimen provided by a training organization under the supervision of an Appropriately Qualified Person, who is authorised by the training co-ordinator to conduct and record on Annex D3 the results of such tests.

Note 4: The Certification Body will accept supervised practical testing of training specimens administered by a training establishment which is formally recognised by the CB.

Note 5: Surveillance may be called for by the certificate holder, employer, the employer's client, inspection authority or regulatory body. For the surveillance to be recognised by the Certification Body, all surveillance activities shall be carried out in accordance with a formal documented procedure, a copy of which is to be submitted to the Certification Body upon demand.

Appropriately qualified person: An individual (carrying out re-inspection, monitoring or supervised tests) holding ISO 9712 Level 2 or Level 3 certification, or other relevant certification acceptable to the Certification Body. The certification concerned must cover the same NDT method and product or industry sector as that certification which is the subject of surveillance.

Corrective action: *[where surveillance of a certificate holder reveals a deficiency in the performance of NDT for which he or she is certificated]* the implementation of two or more of the following actions:

- further training (recorded using Annex D2),
- additional surveillance,
- amendment of NDT procedures,
- recall of work,
- notification of clients,
- suspension of authorisation to test, or
- other appropriate actions with time scales for implementation;

Note 6: Wherever non-conformance affects the previously published results of tests, intended corrective actions and satisfactory implementation should be notified to directly affected parties, e.g., to the Certification Records Office, the employer's client and/or the applicable regulatory body, which should be requested to confirm in writing the acceptability of the corrective action.

3. Procedure for Renewal of a Certificate

3.1 It is the responsibility of the certificate holder to initiate the procedure required for renewal. The renewal application shall be presented within the six months before the date of expiration of the certification. To ensure continuity of certification, applicants are advised to ensure that the application reaches the Certification Records Office not less than 8 weeks before expiry.

3.2 It is the responsibility of the applicant to ensure the correct issue status of F-85 prior to making application. Details of the issue status of documents are published and available at www.iandtc.org or directly from the Certification Body upon request.

3.3 One application (Annex A) is to be submitted for each certificate for which renewal is sought, and the applicant is required to complete Parts A, B and C of the form. The employer finally completes Part D. The completed application is to be sent to the Certification Records Office at 5, Thirupugal Street, Kamakshi Nagar, Valasaravakkam, Chennai 87, clearly marking the envelope "Certificate Renewal", together with:

- a certificate of satisfactory visual acuity (recorded on document F-83) issued in the preceding twelve months;
- a record of employment (using Annex D1) covering the period of validity of the certificate to be revalidated;
- a completed record of surveillance (using Annex D3) sufficient to confer eligibility for renewal (see note 8);
- the current renewal fee (details of fees are supplied separately in document F-41) for each certificate to be renewed.
- A completed form F-74 where the holder's wallet card was issued more than ten years ago.

Note 8: the penalty for failure to provide satisfactory surveillance records at renewal is that the applicant must follow the procedure for recertification.

Note 9: There is a high percentage of verification carried out on information submitted in support of applications for renewal. In the event that a deliberate attempt to deceive is detected, severe penalties will be applied. If in doubt about the validity of the information you are providing, seek the advice of the Certification Records Office. Attention is drawn to the Code of Ethics (F-71) which is binding upon all certificate holders.

3.4 Holders of radiography certification at all levels will be required to be in possession of valid basic radiation safety or radiological protection certification (or alternative national radiation safety certification where the certificate holder concerned is engaged in radiography exclusively outside of the country of issue of the certificate concerned) to maintain the validity of the radiography certificate.

3.5 In the event that the application for renewal is rejected on the grounds that the continuity of work activity criterion for renewal is not satisfied, the applicant is permitted to attempt in the recertification examination provided he or she satisfies the visual acuity requirement and undertakes a continuation training course (at an ATO) of not less than two days duration covering the scope of the certificate to be revalidated. Such training is to be recorded on the form at Annex D2 and submitted with the application for recertification.

3.6 The candidate who has been refused renewal and has failed to satisfy the requirements for recertification will be required to be successful in the initial qualification examination for the sector and NDT method concerned.

4. Procedure for Recertification And Supplementary Examination

4.1 It is the responsibility of the certificate holder to initiate the procedure required for recertification. The recertification application shall be presented within the six months before the date of expiration of the certification. To ensure continuity of certification, applicants are advised to submit a recertification application (F-78) not later than 8 weeks prior to certificate expiry,

4.2 Applications for supplementary examination (which also serves as recertification) using form F-78 may be submitted at any time during the validity of the certificate, but must be received by the CB not later than 8 weeks prior to the date of certificate expiry. Form F-78 is obtained from www.iandtc.org must be completed and submitted by the applicant to the CB, together with:

- a certificate of satisfactory visual acuity (document F-83 refers) issued in the preceding twelve months;
- a record of employment (using Annex D1) covering the period of validity of the certificate to be revalidated;
- completed records of surveillance (using Annex D3) where available ;
- a completed record of continuation training (where appropriate) using Annex D2;
- A completed form F-74 where the holder's wallet card was issued more than ten years ago.
- the current recertification or supplementary examination fee

INTERNATIONAL ACADEMY OF NDT
RENEWAL AND RECERTIFICATION OF LEVELS 1 & 2 CERTIFICATES

Note 11: It is strongly recommended that employers of certified NDT personnel implement a system of internal surveillance as described in Annex B. Records of surveillance shall be submitted with applications for renewal and recertification in order to demonstrate satisfactory work activity without significant interruption.

4.3 In the event that a certificate has expired, a supplementary examination is not permitted, but the holder may apply to the Certification Records Office for *late recertification* up to 12 months after the date of expiry (and no later) using form F-86, which may also be used by individuals who recognise in advance that, for whatever reason, they will be unable to submit their application for recertification by the expiry date, in which case they may apply on F-86 for deferred recertification. It is emphasized that acceptance of an application for late or deferred renewal/recertification does not extend the validity of the certificate concerned.

4.4 To recertify, the certificate holder must successfully complete a practical recertification examination. The recertification examination will include testing selected specimens appropriate to the scope of certification to be revalidated and, for Level 2, the production of a written NDT instruction suitable for use by Level 1 personnel.

4.5 If the individual fails to achieve a grade of at least 70 % for each specimen attempted, one retest of the whole recertification examination shall be allowed after at least 7 days and before 6 months.

4.6 In the event of failure in the one allowable retest, the certificate shall not be revalidated and, to regain certification for that level, sector and method the candidate shall apply for new certification. In this case, no examination exemptions shall be awarded by virtue of any other valid certification held.

4.7 In addition, holders of radiography certification at all levels will be required to be in possession of valid basic radiation safety or radiological protection certification (or alternative national radiation safety certification where the certificate holder concerned is engaged in radiography exclusively outside of the country of issue of the certificate) to maintain the validity of the radiography certificate.

4.8 Holders of Level 1 or 2 certification who wish to add an additional category (where appropriate) at the same level, will be required to attempt a supplementary examination comprised of specific written and/or specific practical parts.

Note 12: Because the candidate who is unsuccessful in the recertification process will be considered an initial candidate for certification in that sector, method and level covered by the original certificate, candidates are advised to prepare thoroughly for recertification. It may be considered advisable to undertake continuation training before attempting the recertification examination. Such training is to be recorded using Annex D2.

Note 13: Appeals may be made against failure to recertify a certificate. All appeals must be made in writing to the Certification Body and will be similarly acknowledged. The procedure for Complaints and Appeals is contained in document **PD-21**

RENEWAL AND RECERTIFICATION OF LEVELS 1 & 2 CERTIFICATES

Annex D3 To F-85 - Record of Monitoring The Certificate Holder's Competence

Including on-the-job monitoring or re-inspection, and/or testing a training sample provided by an ATO. Use a different sheet for each certificate.
 A minimum of one recorded surveillance per annum **for the last 5 years** is acceptable, but a record of all surveillance should be made.

NOTE:-Please ensure surveyor is qualified to same method as the certificate that is subject of monitoring. A copy of the surveyor's certificates within dates of surveillance must be submitted with application(unless validity can be checked online, in which case provide a link to the verification website.

Certificate Holder's Full Name:			Candidate ID Number:	Certificate Number:	
Date Of Surveillance	Job/Report Reference & Brief Description Of Test Piece Or Training Specimen	Name, Number & Contact Telephone Number Of Surveyor	Employer Of Surveyor	Signature Of Surveyor	Result Of Surveillance Pass/Fail

INTERNATIONAL ACADEMY OF NDT
RENEWAL AND RECERTIFICATION OF LEVELS 1 & 2 CERTIFICATES

Annex D4 To F-85 - Record of Practical tests carried out to Monitor the certificate Holder's Practical Competence

Including testing a training sample provided by an Training organization approved by CB. Use a different sheet for each certificate.
 A Maximum of two recorded practical tests per 12 month period, for the last 5 years is acceptable.

Certificate Holder's Full Name:			Candidate ID Number:	Certificate Number:	
Date Of Test (DD/MM/YY)	Report reference & detailed description of training specimen	Name of the Training organization, contact, email address and telephone number of trainer	Employer Of authorized trainer	Signature Of authorized trainer	Result Of Test Pass/Fail
